

About Me

Mahdi specializes in planning, controlling, and managing projects. He started working with projects about 19 years ago: first, as a project planner in oil and gas sector, and then he moved to large construction projects including high-rise five-star hotels and residential and commercial luxury towers.

In parallel, Mahdi has involved in design & develop BI dashboards. He has also many years of academic experience in teaching concepts and software of project planning, scheduling and control (more than 1,800 hrs. course held)

Mehdi has experience in preparing, assessing, arbitrating, and defending delay, disruption, acceleration, and prolongation claims.

He utilizes a wide range of software from general software like Excel and MSP to more specific complex ones like Primavera P6, BIM (Navisworks and Synchro Pro) and Power BI to fulfil the requirements of project stakeholders in all aspects.

Mehdi is a detail-oriented, meticulous and well-organized person and interested in learning, with strong interpersonal communication and group working skills.
